

Decorative Trims

*servicing retail, commercial
& industrial markets
for over 40 years.*

DTA Decorative Trims are designed to provide edge protection where tiles are bordered by plaster, carpet, timber or vinyl, while still providing maximum tile protection.

DTA Decorative Trims are available in PVC, Aluminium, Stainless Steel and Brass.

Selecting the Right Trim

- ✓ All DTA trims are designed to be used internally.
- ✓ For external projects we recommend Matt Silver Anodised Aluminium or 304 Grade Stainless Steel.
- ✓ 316L Marine Grade Stainless Steel is ideal for projects close to the beach or around a pool.
- ✓ Aluminium, Brass, or Stainless Steel finishes are best suited for installation in high traffic areas.
- ✓ PVC trim is an economical option but not recommend in high traffic areas.

🏠 Matt Silver is also suitable for exterior use.

Handy Hints for Laying Tiles

- ✓ Ensure area is clean before commencing.
- ✓ Set out tiles and trims and make required cuts before applying adhesive.
- ✓ When applying adhesive make sure there is an even spread to ensure the tile and trim are securely embedded.
- ✓ Use tile spacers for an even spacing.
- ✓ When grouting always remove excess grout from trims immediately, using warm water. Failing to do so could result with the lime in the grout reacting to the anodised coating.
