**Instructions**

1. Trace around the back of the insert, not including the mounting flange
2. Ensure there are at least 2 edges running along noggins
3. Cut out substrate as marked
4. Place niche in to the hole and ensure it is level
5. Apply silicone in a continuous line around the mounting flange
6. Secure the niche in the wall with fasteners (not supplied)  
Recommended screws: Size 8 - 10 x 30mm
7. Apply waterproof membrane
8. Feather out the flange to the substrate using a polymer modified adhesive
9. Tile to finish
